The biological butanol technology developed by the Target Group is a technique which transforms high concentration organic sewage into an environmental friendly, clean and renewable green energy source through the process of injection of plant extract additives resulting in the reaction and fermentation of special microbial community.

REASONS FOR THE POSSIBLE ACQUISITION

The Group is principally engaged in (i) new energy business, (ii) hotel hospitality business, (iii) provision of money lending services, (iv) manufacturing and trading of electric cycles, (v) trading and distribution of liquor and wine, and (vi) investments in listed securities.
